Alberta Seniors United Now (SUN) is a non-profit organization established in 2003 to enable all seniors in Alberta to participate and contribute to the well being of the Province of Alberta.

Please review the attached letter we sent to Mr. Troy Mann – President and CEO of the Local Authority Pension Plan Corporation. It contains information regarding their pension plan and AIMCo's recent investment fund return of 12.3%. In response to our communication with them, on their website "Local Authority Pension Plan Cost of Living, they state the following; Due to their plan's strong financial position, on January 1, 2026 retired and deferred members will receive a one-time COLA of 90 percent of the increase in Alberta's consumer price index, up from the usual 60 percent. This will result in more of an increase to their monthly pensions. Other plans like the Alberta Teachers Retirement fund will also receive the same increase.

In addition, contribution rates for both plan members and employers will decrease by roughly one percent for the 2026 year, with surplus funds making up the difference. As of 2024 this pension plan had \$70.7 Billion in assets.

Our SUN Board of Directors is pleased that our request has been enacted upon by the Pension Sponsor Board.

Upon reviewing the Public Service Pension Plan website, we acknowledge the following items;

- ◆ A Public Service Pension Plan pensioner, on average receives \$20,512 per year.
- ◆ Currently there are 31,878 retirees receiving their pensions.
- ◆ The pension fund assets are \$21 Billion and the investment income was \$2.9 Billion.
- ◆ The 2024 pension performance was 14.8%
- ◆ The Annual administration costs per member was \$229.00

The PSPP website indicates that only 60% of COLA will be provided to the retirees which would come to \$20.51 per month. We are requesting for your consideration to provide 100% of the cost of living which would provide an additional increase to \$13.67 which would increase their total monthly increase to \$34.18 per month. Providing this increase, based on the number of retirees it would reduce the investment income of \$2.9 Billion by \$435,772 which calculates to a miniscule 0.002%, which could have minimal impact on the pension plan.

Alberta seniors are well aware of their increased costs for eye exams, prescription drugs, Covid shots, food, utilities, property taxes and an increase to their pensions would help them in their financial situation.

It is important to note that other pension plans Albertans receive, provide 100% of COLA, such as the CPP, Old Age and LAPP. Alberta Premier Danielle Smith has indicated that if Albertans decide to leave the CPP, the proposed Alberta Pension Plan would provide 100% COLA and it only makes sense that PSPP should also receive the same.

In summary, we are requesting that the Public Service Pension Board consider our request and we are looking forward to their response on this issue.

Sincerely,

Wayne Sorenson - President, Seniors United Now
